SCHOOL UNIFORMS

School uniform has many advantages and disadvantages, also. It depends on what people think about it. They have their own point of view, therefore we have many different opinions. Some people think that school uniform is not really good for students because it prevents students from expressing themselves, it can make them feel uncomfortable, and they don't want to be seen the same as all the students. In my opinion, wearing school uniforms is good because it can help distinguish students from other people, make them feel equal, and also make them proud of their school.

First of all, school uniforms help students be distinct from other people. We can identify who are students or not at school or even outside school if they are wearing uniforms. Moreover, students who are wearing uniforms can be helped by many people. For instance, they have more discounts or benefits from others because people think that "Oh, they are students, they study lots of good things at school, and they will be the future of the country, so I will give them some discounts and encourage them to be a good student". Therefore, school uniform is useful for students because it helps distinguish students from others.

Secondly, school uniforms make students feel equal. The worst thing that could happen at school is that if you identify who are the rich students and who are not, you will treat them differently, although you didn't realize that. Then, poor students who know your unkind behaviors may feel uncomfortable, miserable, and disappointed. They don't have any encouragement to study hard, and they might be very bad students. But if students are required to wear school uniforms, you won't recognize who is rich or who is poor. Everybody
